

Company Message

Dear Betcom Customer;

As we are leader in the field of the decoration materials in Egypt for long years and we gained our expertise through carrying out a wide range of projects and dealing with clients. We believes that the products must be competitive in the quality and the prices with time factor and from our expertise with our clients which formed our philosophy which revival is committed to providing a transparent service for clients' exceptional quality and outstanding excellence every step of the way, So you can be confident that you will receive the best value for your investment.

We believe that people are our most valuable assets, Understanding our customers' requirement and translating their vision to achieve satisfaction. Our aim is to become a window that overlooks, including consultants, contractors and engineers on the latest technologies in the world of decoration.

The company took upon itself the responsibility of developing and improving the quality of services provided to you and we also explore the views of our customers and their needs are studying to gain access to the required degree of efficiency.

Our decorative products premium quality and durability whether building a new house or remodeling. The products can match the decorative impact, versatile and permanence of architectural requirements. Products are of standard size, durable, Lightweight, weather resistant, smooth surface and ready to paint.

General Manager

Waseem Hassan

Our decorative products are produced from high quality materials (plaster powder) reinforced with fiber glass in moulds of fine 3D shapes.

All our GRP are modeled and produced in high quality non-Toxic plaster powder and glass fiber to yield the fine quality add class and elegance touch / image to your wall and ceiling decorations.

The products can be touched up / painted with any type of paint.

Plaster is a natural mineral-based product. It is non-combustible, asbestos-free, and is free from harmful agents or petrochemical agents and Chlorofluorocarbons, Formaldehyde free.

Technical drawing of a decorative plaster product. It includes a title block with 'Building Plaster, Limestone (BET)' and 'Plastering & Rendering Services (BET)'. The drawing shows a cross-section of a plaster layer on a wall, with dimensions for the plaster thickness (10mm) and the wall thickness (100mm). It also includes a table of material specifications and a list of notes.

CFCs (Chlorofluorocarbons), were actually used as a blowing agent in others type of moldings products (PU molding) productions. All foams require a blowing agent in order to be able to expand in addition, they decrease the severity or a reaction to temperature changes, they allow for a control when it comes to density and viscosity, and soften the foam.

Plaster adhesive is easy to use just mix with water and it is ready for use in fashioning designs to enhance walls and ceilings. Its natural-based characteristics make Plaster highly compatible with the modern environment as it works in harmony with nature and does not affect the ecological balance.

Advantages :

- Easy & Fast Installation
- Strong and Durable
- Excellent thermal and sound insulation
- No expansion and contraction occurs
- Fire Resistance and didn't transfer the fire from

place to another like the PU cornices (foamed)

- Highly resistant to the fungal attack
- No Ultra-Violet Effect
- Free from any harmful agents or petrochemical agents
- Excellent Finishes Decoration (3D shapes)
